

HB 5447

I am writing this email as I am opposed to the new legislation attempted to be passed. This will deeply have an impact on the students of the private school I am proud to be part of. Our services provide behavioral and academic assistance for these children and young adults in settings that the public school cannot provide similar resources for.

Please reconsider this legislation as it can affect many families of those children who need specific assistance for these behavioral services as well as the staff who support the cause. Thank you,

Ashley Rouse
